SUITs FORD PX RANGER 9/2011-7/2015

See Page 7 for Ford PX Ranger Mk II 8/2015+ Installation Guide

• It will take about 4 hours to install.

NOTE: This product has been tested for air bag compatibility and therefore the mounting system MUST NOT be modified

IMPORTANT: Bull Bar installations should only be done by a qualified person and it is the responsibility of this person to ensure correct fitment.
1. Before installation check bull bar application is compatible with your vehicle.
   
   Before making any cuts, please refer to bumper cutting instructions applicable to your vehicle model (Ford PX Ranger 9/2011 - 7/2015).

2. Remove grill, bumper bar, bumper bar reinforcement and bumper support brackets.

3. Mask lower edges of mudguards and paint satin black as shown.

4. Measure 100mm from point on bumper bar as shown, and mask down bumper bar from this point.
5. Mask a line along ridge of bumper bar as shown. Using an air hacksaw or similar, cut along lines previously marked to remove the lower section of the bumper bar.

6. Temporarily refit top section of bumper bar (Cut in previous step) to vehicle. Using end of bumper bar as a guide, mark cut lines onto plastic bumper support brackets. Remove from vehicle and cut as shown.

7. Re-fit previously modified section of plastic support bracket and top section of bumper bar to vehicle, using the original mounting hardware.
8. Install chassis bracket as shown using hardware provided.

9. Using chassis bracket as a guide, drill a 12.5mm hole through chassis and install bolts, flatwashers, spring washers and nuts as shown.

10. If winch is being installed, refer to winch installation instructions, Pages 13 - 14.

11. Unwrap bull bar. Check over riders and light assemblies are tight in bull bar before installation.

12. Fit bull bar to chassis brackets using M12 bolts, flat washers, spring washers and nuts provided.

13. Align bull bar with vehicle leaving a 10mm gap between bullbar wing and mudguard. Tighten all bolts.
14. Once bar is aligned with vehicle and tightened drill through pinning holes between bull bar and chassis bracket and secure with bolts, washers and nuts provided.

15. Connect park lights, indicators and fog lights as per wiring diagrams at the back of fitting instruction guide on page 15.

16. Re-fit grill.

17. Fit protection plates to underneath of bull bar using M8 bolts, spring washers and flat washers provided.

BBA038/ BBT038
SUITS FORD PX RANGER Mk II 7/2015+

- Ironman 4x4 BBT/ BBA038 Bull Bars fit to a Ford PX Ranger Mk II 7/2015+.
- It will take about 4 hours to install.

NOTE: This product has been tested for air bag compatibility and therefore the mounting system MUST NOT be modified

IMPORTANT: Bull Bar installations should only be done by a qualified person and it is the responsibility of this person to ensure correct fitment.
1. Before installation check bull bar application is compatible with your vehicle. Before making any cuts, please refer to bumper cutting instructions applicable to your vehicle model (Ford PX Ranger Mk II 7/2015+).

2. Use bodyline on bumper and grill as reference to mark cut line on assembly as shown in pic A.

   Position cutting template in place under headlight and align with guard edge and grill line.

3. Remove grill and bumper bar assembly.

   Cut bumper and grill assembly along marked line. Use an air hacksaw or similar to remove the lower section of the bumper bar.

4. Temporarily re-fit top section of bumper bar (cut in previous step) to vehicle. Using end of bumper bar as a guide, mark cut lines onto plastic bumper support brackets.
5. Remove bumper and plastic bumper support brackets. Cut along marked line as shown.

6. Mask lower edge of guard and paint lower section satin black as shown.

7. Re-fit plastic bumper bar support brackets as shown.

8. Remove air duct shields as shown. Disconnect temperature sensor from passenger side before removing.
9. Mark up cut lines on passenger side of air duct shields following the edges and contours of the shield as shown in pic A.

Repeat the process for the drivers side as shown in pic B.

Re-fit modified air duct shields, remembering to re-connect temperature sensor to passenger side.

10. Install chassis bracket as shown using hardware provided.

11. Using chassis bracket as a guide, drill a 12.5mm hole each side through chassis and install bolts, flatwashers, spring washers and nuts as shown.
12. If winch is being installed, refer to winch installation instructions, Pages 13 - 14.

13. Unwrap bull bar. Check over riders and light assemblies are tight in bull bar before installation.

14. Fit bull bar to chassis brackets using M12 bolts, flat washers, spring washers and nuts provided.

15. Align bull bar with vehicle leaving a 10mm gap between bullbar wing and mudguard. Tighten all bolts.

16. Once bar is aligned with vehicle and tightened drill through pinning holes between bull bar and chassis bracket and secure with bolts, washers and nuts provided.

17. Connect park lights, indicators and fog lights as per wiring diagrams at the back of fitting instruction guide on page 15.

18. Re-fit bumper bar and grill assembly.
19. Fit protection plates to underneath of bull bar using M8 bolts, spring washers and flat washers provided.

20. Disconnect and remove keyless entry antenna from rear of drivers side guard liner base as shown in pic A. Trim guard liners using protection plates as a guide.

   Align top bolt hole of keyless entry antenna with existing bolt hole in guard liner and reattach with double sided tape higher up on the guard liner.

   Reattach guard liners to protection plates using clips provided, see pic B.
Winch Installation

FOR MKII ONLY

Grill and bumper will need to be modified as shown in the 6 images below.
Winch Installation

1. Bolt winch to cradle with gearbox to the left hand side of vehicle and cable spooling from bottom of the cable drum using bolts and washers provided.

2. Bolt fairlead to recess in front of bull bar using bolts, washers and nuts provided.

3. Fit bull bar to vehicle referring to steps 12 - 17 of bull bar fitting instructions.

4. Mount control box in desired location.

5. Connect three colour coded cables to the corresponding poles on winch motor.
6. Connect the thin black earth wire and negative battery cable to the earth connection on the opposite side of winch motor.

7. Run the positive and negative battery cables into the engine bay taking care to secure cables away from any sharp or moving objects.

8. Connect positive and negative battery cables main battery of vehicle (Not Auxiliary Battery).

9. Attach breather hose to barb fitting on winch motor. Run hose to the highest available point in engine bay and cable tie in position. Cable tie hose away from any sharp, hot or moving objects.
