Offset Caster Correction Bushes
2° Increase for 50mm Lift

1. Mark Radius Arms here, vertical to level ground, in line with centre of bush before raising vehicle.

2. Remove arms from vehicle.
3. Press out original bushes.
4. Lay Radius Arm on this template for hole positions.
5. Position front bush with small notch in line with your vertical line on arm and press front bush into arm.
6. Align and press rear bush into arm ensuring distance between centres is 149mm±0.5mm.
7. Ensure bushes in both arms are identical. (Lay arms together to verify)
8. Re-install arms to vehicle, and perform wheel alignment. (Check tension of bolts after 500km)
