Isuzu D-Max 2012 +

Kit Contains:

- 1 x brake line relocation bracket
- 2 x M8 bolts
- 2 x M8 nuts
- 2 x M8 spring washers

Tools & Equipment

- 1 x 12mm spanner
- 1 x 14mm spanner
- 1 x pair of pliers

1. Remove spring clip that retains brake line and existing bracket.

2. Gently pull brake line through bracket so that fitting is clear of hole.

3. Using hardware provided, secure new bracket as shown to existing bracket on chassis and tighten.

4. Position brake line in new bracket and re-attach spring clip.

5. Secondary to kit installation, a relocation of this brake hose bracket on the LH chassis rail is necessary.

6. Using the 12mm spanner, remove both bolts, securing the bracket.

7. Reposition bracket so that top hole in bracket is aligned with bottom hole on chassis rail.

8. Re-fit one bolt to secure bracket to the rail in the position shown.

Warranty will be voided by damage or failure caused by incorrect procedure.
Before proceeding to install Brake Line Relocation Kit please fully read instructions and ensure that necessary tools are on hand.

Always wear personal safety protection ie. Safety glasses and gloves to prevent injury.
